

1 clear at least some of an output memory, jump to a predetermined instruction, and  
2 commence or recommence generating video image information based on said  
3 predetermined instruction.

4 7. A method of generating a television display at at least one of a plurality of  
5 receiver stations, each of said plurality of receiver stations having a television monitor  
6 for displaying television programming and a processor for generating and  
7 communicating at least some of a video image of said television programming to said  
8 television monitor, comprising the steps of:

9 (1) receiving and storing a clear-and-continue signal; and

10 (2) causing said clear-and-continue signal to be communicated to a  
11 transmitter at a specific time, thereby to transmit said clear-and-continue signal, said  
12 clear-and-continue signal effective at said at least one of a plurality of receiver stations  
13 to control said processor to clear at least some of an output memory, jump to a  
14 predetermined instruction, and commence generating video image information based  
15 on said predetermined instruction.

#### REMARKS

Applicants respectfully request consideration of the instant Supplemental Preliminary Amendment with respect to the above-described application.

The Commissioner is hereby authorized to charge any additional fees or credit any overpayment of fees in connection with this communication to Deposit Account No. 08-3038.
